Walter,

The following 4 documents were received from ATSDR this FY:

Public Health Assessments:

Cabo Rojo
Dewey Loeffel LF
Black River

Public Health Consultation:

Garfield Chromium

So, you can claim four documents from ATSDR on 4 newly proposed NPL sites. Just not 2 in NJ and 2 in PR.

I know you've been checking with ATSDR about this commitment (which appears in both my PARS agreement and in the regional Action Plan ... not sure why we did that, but there it is). Anyhow -- any further news?

This is the commitment in the Action Plan:

Will work with ATSDR on four FY11 proposed NPL sites in NJ and PR to perform health assessments.

And this was the update at mid-year:

Work is ongoing. Initial release date for 3 of the 4 sites (Mansfield Trail, Cabo Rojo & Hormigas) scheduled for Sept. 2011; NJDHSS is working on cancer incidence analysis for 4th site (Garfield Chromium) -- updated Public Health Advisory may be necessary; EPA may also recommend that ATSDR consider doing physician outreach in the community.
